The Stairway To Heaven: Book II Of The Earth Chronicles (The Earth Chronicles)

Synopsis

Since earliest times, human beings have pondered the incomprehensible questions of the universe, life . . . and the afterlife. Where did mortal man go to join the immortal Gods? Was the immense and complex structure at Giza an Egyptian Pharaoh's portal to immortality? Or a pulsating beacon built by extraterrestrials for landing on Earth? In this second volume of his trailblazing series The Earth Chronicles, Zecharia Sitchin unveils secrets of the pyramids and hidden clues from ancient times to reveal a grand forgery on which established Egyptology is founded, and takes the reader to the Spaceport and Landing Place of the Anunnaki godsâ"Those Who from Heaven to Earth Came."

Customer Reviews

In this second entry in the Earth Chronicles series, Sitchin focuses on man's eternal and perpetual search for immortality and ties his findings in with his theories of ancient Sumer and the Annunaki who originally colonized earth. In particular, he discusses Alexander the Great's desperate search for a way to escape an early death as well as Gilgamesh's epic search for everlasting life; more importantly, he provides a map of their quests, identifying their most important destinations with the ancient Sumerian sites he wrote about in The 12th Planet. Basically, the ultimate destinations of the men of legend corresponded to the areas from which the Annunaki journeyed back and forth between earth, their orbiting spacecraft, and their home planet. Having described an intricate grid system accounting for the specific locations of the ancient cities both before and after the Deluge, he makes some fascinating arguments. I was most struck by his conclusion that the new, post-Deluge space port was actually Jerusalem. As always, Sitchin incorporates Biblical texts into

his story, revealing compelling connections between the books of the Bible and the ancient records of the earliest Middle Eastern cultures. I found myself plodding to some degree through the first half of the book, even laying the book aside for a few days, but the latter sections here are quite interesting because they focus on ancient Egypt. Sitchin's discussions of the ancient Egyptian monuments, particularly the Great Pyramids at Giza are enlightening and fascinating. He forcibly argues that the pyramids were never meant to serve as burial places of ancient Egyptians and that the Great Pyramids and the majestic Sphinx were built long before Khufu, Chephren, and other pharaohs of the 4th Dynasty came to power.
