## Customer Reviews

They used words that went with the letters but they were not commonly used words in neither english or spanish. Didnt provide any kind of pronunciation breakdown. Had to rely on the internet in order to teach my toddler. Otherwise the cards are of good quality

I am bilingual, but have not used Spanish in a long time and the old saying "If you don't use it, you lose it" really does apply. In any case, this set of flashcards are GREAT for visual reinforcement and for studying at work or wherever you're at. I am now introducing my kids to Spanish and this is helping them understand the Spanish alphabet. My kids are 5-12 and they enjoy the flash cards. I hope this helps!JPM

The quality of the cards isn't the best. They are made from thin cardboard. But, they are decent cards, and I think they will help. For \$3, and free shipping, I really can't complain. I'm glad I bought them.

The flash cards are nice and simple with good pictures. The only reason I did not give it 5 stars is because there are some cards that even I am not familiar with - like a *Walia*?? What the heck is that? I ended up pulling those cards out of the deck.

Love these! I am using them with my three year old, I don't recommend any younger, I had bought a different set a year ago which she destroyed (but oh well, it helped to learn her alphabet); it is colorful, simple and it comes with two sets of 26 cards!:)

These are a good size for taking along to the park or practicing on a long drive - keeping the kids entertained as they learn. Some of the translations aren't exactly the word I would have used - but these are just minor variants and they can be used to teach kids how rich the Spanish language is and how different countries/regions have their own way of saying things.

They get the point across I guess, but these are ideal for older children (5-6) since the material is only slightly thicker than an index card. They would not survive the wrath of an infant or toddler.

Large colorful heavy-paper flashcards that are easy to use with students. However, some words are difficult for young learners while others are obscure and not necessarily known by most students. E.g., "boat" is great for the letter "B", but something like "ant" might be better with the letter "A" than "armadillo". "Kimono" and "quetzal" aren't even words that you'd expect to be commonly known by elementary school age students.
